

General Population Quarantine Guidance

What to do when
you are
identified as a
Close Contact

If you are experiencing
any symptoms during
the 10 days,

IMMEDIATELY ISOLATE at
home and get tested as
soon as possible.

www.baycountymi.gov/Health/Covid19/

*Individuals should monitor for symptoms throughout quarantine period (days 1-10).
Day "0" is the last date of close contact with a COVID-19 positive person.*

NO QUARANTINE IF:

- You are an adult (18yr+) that has completed a primary vaccination series more than 2 weeks ago within past 5 months
- You have received a booster dose
- You are a child (5-17yr) that has completed the primary vaccination series more than 2 weeks ago
- Tested positive for COVID-19 in the past 90 days.

ACTIONS TO TAKE:

- Wear a well fitted mask around others for 10 days.
- Monitor for symptoms
- Get tested on or after day 5, if positive or symptoms develop, begin ISOLATION

NEED TO QUARANTINE IF:

- You are an adult that was fully vaccinated over 5 months ago, but have not received a booster dose
- Had your last primary dose less than 2 weeks ago
- Are un-vaccinated

ACTIONS TO TAKE:

- Quarantine for **AT LEAST** 5 days.
- Wear a well fitted mask around others for 10 days.
- Monitor for symptoms.
- Get tested on or after day 5, if positive or symptoms develop, begin ISOLATION.
- If negative, may end quarantine and resume activities on day 6

Persons who test positive for COVID-19 should isolate at home for 5 full days after symptom onset (or 5 days after the positive test if they do not have symptoms). Isolation can end and the person can return to community activities on day 6 if they have no symptoms and can wear a surgical, KN95 or N95 mask for 5 additional days.
